Since 1997 Elinext Group has been providing our customer with outsourced testing, quality assurance and quality control that increase software quality, accelerate time-to-market, reduce the cost of development and maintenance of enterprise systems, web and mobile applications. With our QA team in Vietnam managed by managers from Belarus you get schedule flexibility, low price and excellent QA services.
QA AT ELINEXT IN FIGURES

2 Test Centers of Excellence
45 QA & Testing Analysts
14 Years of Experience in SQA
200+ Completed Projects

500 000+ Test Cases / Checklists Developed
3 000 000+ Tests Executed
We constantly monitor and control the processes during all 5 stages, because we believe this is the cornerstone of a successful project completion. This process includes progress reporting and corrective and preventive actions taken in order to keep the project in line with the test strategy and test plan.

CLIENT-ELINEXT COOPERATION MODEL

Client’s responsibilities:

• Chair the meetings (Daily, Retrospective etc.)
• Escalate QA-related issues to the Manager
• Developing and adapting the product vision
• Writing new user stories
• Splitting big user stories
• Ordering the product backlog
• Doing release planning

Manager’s responsibilities:

• Facilitate of inter-team communication across agile projects within organisation
• Being an escalation point for testers
• Presenting an aggregate view of testing utilization to high level management
• Providing technical expertise, e.g. proper use of test techniques in appropriate cases
• Ensuring Scrum Teams implement and follow best practices to prevent defects

QA Team’s responsibilities:

• Writing regression & acceptance tests
• Running regression tests
• Ensuring proper use of testing techniques and tools
• Configuring, using, and managing test environments and test data
• Reporting defects and working with the team to resolve them
• Coaching other team members in relevant aspects of testing

• Ensuring the appropriate testing tasks are scheduled during release and iteration planning
• Actively collaborating with developers and business stakeholders to clarify requirements, especially in terms of testability, consistency, and completeness
